European Journal of Operational Research 71 (1993) 473–478
North-Holland

Keyword Index

Volumes 64–71 (1993)

Activity networks, (64) 199, (65) 274
Adaptive processes, (66) 27, (69) 83
Advertising effectiveness, (67) 321
Agency theory, (69) 143
Aggregate production, (65) 199
Aggregation, (64) 103, (70) 212
Aggregation technique, (69) 250
Agriculture, (67) 161, (69) 221
AHP, (67) 64
AIDS, (70) 167
Airfreight, (70) 159
Air transportation, (64) 138
Algebraic languages, (67) 25
Algorithm, (68) 344, (68) 422
Algorithms, (64) 61, (66) 259
Allocation, (66) 272
Analytical hierarchy process, (66) 291
Analytic hierarchy process, (65) 138, (68) 160, (70) 263
Analytic Hierarchy Process (AHP), (69) 200
Applications, (66) 1, (68) 278, (69) 1
Applications of transportation problem, (70) 335
Approximation algorithm, (65) 247
Approximation algorithms, (70) 342
Approximation scheme, (64) 258
Arbitrage, (68) 304
Artificial Intelligence, (64) 21, (70) 1, (71) 247
Artificial neural networks, (66) 27, (69) 83
Assembly line, (71) 353
Assignment, (70) 254, (71) 177, (71) 188
Assortment, (64) 423
Augmented Lagrangian multipliers, (69) 498
Automated guided vehicles, (71) 32
Availability (joint), (68) 90

Backlogs, (64) 12
Backorder costs, (65) 175
Balking, (66) 113
Batch delivery, (70) 272
Batching, (66) 135
Batch processing, (68) 105
Batch production, (67) 358
Batch size, (70) 83
Beale's algorithm, (67) 126
Behavior, (67) 1
Behaviour support, (70) 67
Benchmarks, (64) 278
Benders' decomposition, (67) 428, (67) 443
Bibliography, (68) 278
Bicriteria assignment, (68) 422
Bidimensional knapsack problem, dichotomic search, surrogate dual, (68) 413
Bi-directional flow, (71) 32
Bilevel linear programming, (67) 126
Binary trees, (64) 442
Blocking, (69) 467
Blocking phenomenon, (65) 118
Boolean matrix, (67) 405
Bottleneck assignment, (68) 422
BPERT, (68) 185
Branch-and-bound, (64) 249, (65) 147
Branch and bound, (65) 407, (68) 251, (70) 229, (71) 130, (71) 334
Branch-and-bound algorithms, (65) 368
Broadcasting, (71) 1
Buffer, (69) 166
Buffer allocation, (69) 450

Cancer risk, (66) 36
Capacitated facility location, (66) 305, (70) 150
Capacity assignment, (67) 428
Capacity planning, (67) 321
Capacity selection, (69) 373
Case study, (65) 159
Cash dividends, (68) 318
Cash flows, (68) 318
Cell formation, (69) 292
Cell size determination, (69) 373
Cellular layout, (69) 399
Cellular manufacturing, (67) 405, (69) 312, (69) 330, (69) 342, (69) 357, (69) 413, (69) 438
Cellular manufacturing cell layout, (69) 284
Cellular Manufacturing Systems, (69) 450
Centre, (65) 400
Chaos, (68) 145
Chebychev norm, (68) 344
Chinese postman problem, (65) 218
Circuit grouping, (67) 443
Classes of processors, (70) 316
Clique polytope, (69) 121
Closed queueing networks, (69) 250
Closed queuing networks, (67) 373
Cluster analysis, (64) 103, (69) 384
Coalitions, (64) 442, (64) 449
Coefficient of variation, (65) 235
Coherent structure, (69) 65
Collision detection, (65) 343
Combat model, (67) 111
Combat nomogram, (67) 111
Combinationaial analysis, (66) 392
Combinatorial analysis, (64) 410, (66) 353
Combinatorial optimization, (64) 278, (65) 68, (69) 238
Common due date, (70) 272
Communication, (70) 67
Communication networks, (67) 428, (67) 443
Communications, (66) 100
Competitive location, (66) 372
Complexity, (70) 115, (70) 254
Complexity analysis, (67) 248
Complexity results, (70) 350
Complexity status of regular performance measures, (71) 366
Computational analysis, (68) 400, (71) 17, (71) 70
Computational complexity, (64) 138, (66) 259
Computer networks, (71) 1
Computers, (68) 400
Computer software, (64) 354
Condorcet point, (66) 372
Construction, (69) 131
Container transportation, (65) 368
Continuous time lotsizing with time-proportional demand, (69) 154
Control, (67) 75, (71) 235
Controllable times, (70) 335
Control variates, (71) 80
Convex cost, (64) 286
Convexity, (65) 270
Convex programming, (65) 407, (71) 235
Coopeative games, (64) 442
Cooperative games, (64) 449
Coordinated transportation systems, (66) 341
Coordination, (67) 141
Corporate earnings, (68) 318
Cost–benefit analysis, (66) 392
Cost minimizing assignment, (68) 422

0377-2217/93/$06.00 © 1993, Elsevier Science Publishers B.V. All rights reserved

Costs, (64) 457
Cost trade-offs, (64) 83
Covering problems, (65) 20
C-programming, (67) 172
Crashing, (64) 286
Crew scheduling, (71) 303
Critical path, (64) 229, (67) 221, (71) 70
Cutting-plane, (69) 121
Cyclic scheduling, (70) 350

Damage counters, (65) 235
Data base management, (64) 21
Database management, (64) 370
Data envelopment analysis, (64) 61, (67) 332, (71) 379
Decision, (64) 384, (66) 216, (68) 236, (68) 374, (71) 398
Decision aid, (66) 184
Decision analysis, (70) 135
Decision making, (66) 72
Decisions under risk, (70) 135
Decision support systems, (68) 173, (70) 150, (71) 341
Decision theory, (65) 138, (66) 184, (66) 235, (67) 1, (67) 64, (69) 210, (70) 263
Decomposition, (67) 373
Degeneracy, (68) 427
Degrees of difficulty, (68) 427
Delivery dates, (64) 12
Departure process, (65) 247
Design, (67) 13, (71) 353
Deterministic inventory model, (64) 370
Development planning, (68) 160
Differential equations, (65) 278
Direction bias, (67) 287
Direct shipping, (64) 83
Disaggregation, (64) 103
Discriminant analysis, (67) 88
Distances, (67) 287
Distributed computing systems, (67) 418
Distribution, (64) 457, (65) 362, (66) 313, (70) 31
Dominance cone, (64) 126
Dorn's duality, (65) 417
Dose-response relationship, (66) 36
Duality, (67) 136, (68) 379, (68) 427, (71) 61
Due-date assignment, (70) 311
Due date assignment procedures, (68) 212
Dynamic, (71) 188
Dynamic events, (69) 424
Dynamic flow equilibrium, (71) 419
Dynamic programming, (64) 199, (64) 354, (65) 199, (66) 113, (67) 161, (67) 172, (67) 188, (68) 105, (68) 134, (71) 303, (71) 439

Ecology, (64) 2
Economic analysis, (64) 354
Economic efficiency, (67) 321
Economic order quantity, (70) 104
Economics, (66) 89, (67) 161, (69) 177, (71) 45
Effective arrival rate, (67) 321
Effective capacity, (67) 321
Effective utilization factor, (67) 321
Efficiency estimation, (67) 332
Efficient chains, (66) 392
Election systems, (70) 254
Empirical statistics, (65) 278
Empty flow balancing, (65) 368
Energy, (64) 2, (69) 26, (71) 334
Entropy, (71) 45
Environment, (70) 16
Epidemiological model, (70) 167
Epistemology, (66) 161, (66) 168
Equilibrium, (66) 372, (71) 188
Equilibrium assignment, (71) 269
Evaluation of staffing alternatives, (67) 321
EVPI approach, (67) 344
Experimental design, (70) 289
Expert systems, (65) 292, (68) 278, (70) 1
Exponential distribution, (65) 118
Extended formulations, (71) 95

Facets, (67) 204
Facility expansion, (67) 321
Facility location, (65) 20, (66) 279
Facility siting, (65) 147
Failure-free operation time, (65) 259
Fatigue failures, (65) 235
Fault-tolerant routing, (71) 1
Feedback queueing networks, (71) 353
Field theory, (69) 14
Finance, (67) 259, (67) 267, (68) 304, (68) 318
Finite buffers, (68) 69
Finite queues, (65) 118
Fishing industry, (64) 338
Fixed job scheduling, (64) 138
Fixed job times, (70) 316
Fleet management, (65) 368
Flexible integrated cellular manufacturing, (69) 399
Flexible manufacturing, (69) 373
Flexible manufacturing systems, (67) 373, (69) 166, (69) 384, (69) 450, (70) 212
Flow balancing, (64) 68
Flow optimization, (71) 317
Flowshop, (64) 249
Flow shop, (69) 330
Flowshop, (69) 467
Flow shop scheduling, (70) 342
Flowshops, openshops and jobshops, (70) 350
Flow time variance, (70) 289
FMS, (66) 1, (67) 387, (71) 17
Forecasting, (68) 291
Fractal curves, (69) 244
Fractional programming, (68) 352
Future research, (66) 1, (69) 1
Futures, (68) 304
Fuzzy clustering, (69) 284

Games, (69) 177, (71) 419, (71) 439
Generalized assignment, (64) 103
Generalized derivatives, (65) 327
General repair, (69) 75
Genetic algorithms, (70) 289
Geometric, (68) 400
Geometrical approximation, (68) 356
Geometric modelling, (65) 343
Geometric programming, (64) 354, (68) 427
Gitting index, (70) 405
Glass industry, (68) 9
Global optimization, (65) 314
Goal programming, (67) 101, (68) 160, (70) 191, (71) 379
Goodsflow control, (70) 159
Gossiping, (71) 1
Government subsidies, (71) 454
Gradient methods, (65) 321, (66) 27
Graphs, (70) 229
Graph theory, (67) 405
Greedy heuristic, (71) 130
Grouped set-up, (70) 177
Group scheduling, (69) 467
Group technology, (67) 405, (69) 284, (69) 312, (69) 342, (69) 384, (69) 438
Growth phenomena, (69) 14
Guidepath, (71) 32

Hazardous material, (65) 33
Headway, (66) 113
Health care policy and management, (70) 167
Health services, (70) 191
Hegemonic cycles/structures, (69) 14
Heuristic, (67) 387, (70) 379
Heuristic algorithm, (69) 467
Heuristic algorithms, (70) 365
Heuristic optimization methods, (69) 65
Heuristic procedures, (65) 336
Heuristic reasoning, (65) 292
Heuristics, (64) 295, (64) 423, (65) 68, (66) 313, (66) 331, (67) 52, (67) 443, (68) 105, (68) 389, (68) 400, (69) 238, (69) 292, (69) 384, (70) 43, (70) 229, (71) 17
Heuristic scheduling, (64) 168
Hierachical decomposition, (64) 312
Hierarchical decomposition, (70) 212
Historical measures, (71) 45
History, (65) 278
Home position, (71) 32
Hypergraph, (66) 353

Implementation, (66) 216
Implied constraints, (71) 61
Impossibility zone, (67) 111
Imputations, (64) 449
Industrial competition, (68) 9
Information, (66) 72, (70) 199, (71) 398, (71) 419
Information economics, (69) 143
Information System–analysis and design, (70) 244
Inquiry system, (64) 21
Inspection, (68) 236, (68) 251, (68) 265
Integer, (65) 362
Integer goal programming, (66) 272
Integer linear programming, (69) 121
Integer programming, (64) 188, (65) 147, (65) 218, (66) 272, (67) 418, (68) 344, (69) 244, (69) 373, (71) 17, (71) 120, (71) 222
Integration, (67) 358, (69) 1
Intelligence structures, (69) 14
Intensity function, (68) 90
Interactive method, (64) 115
Interactive procedures, (71) 341
Interval arithmetic, (65) 314
Inventory, (64) 83, (65) 175, (66) 52, (66) 124, (68) 23, (68) 49, (68) 120, (68) 134, (69) 177, (70) 104, (70) 199, (71) 110
Inventory control, (67) 358
Investments, (67) 259
Iterative approximations, (70) 212
Iterative SOR method, (68) 69

Jobbing production, (69) 399
Job sequencing, (66) 65
Job shop, (69) 187
Job-shop scheduling, (64) 156
Job shop scheduling, (68) 212
Jount replenishment problem, (64) 370
Judgement, (68) 291
Just-in-time, (66) 259

Knap sack, (64) 410
Knowledge base, (69) 357
Knowledge structures, (69) 14
Koch, (69) 244
Kondratiev cycles/structures, (69) 14
Kuhn–Tucker conditions, (67) 126

Labelling algorithms, (69) 97
LAD estimation, (67) 272
Lagrangean heuristic, (65) 383
Lagrangean multipliers, (70) 229
Lagrangean relaxation, (65) 187
Lagrangian duality, (65) 417
Lagrangian heuristic, (66) 305
Lagrangian method, (67) 172
Lagrangian relaxation, (67) 387, (69) 154
Lanchester's equation, (65) 278
Large scale programming, (64) 103
Layout, (64) 410
Lead time, (65) 96, (68) 185
Lead time allowance, (68) 212
Learning, (66) 27, (69) 83
Learning curves, (68) 334
Learning systems, (69) 14
Lifetime quantile, (65) 235
Likelihood ratio ordering, (65) 175
Linear and mixed binary integer programming, (70) 52
Linear fractional programming, (67) 136
Linear inequalities, (67) 204
Linear programming, (64) 68, (65) 147, (65) 343, (66) 353, (67) 75, (67) 88, (67) 136, (67) 443, (68) 356, (68) 379, (70) 126
Linear programming, (71) 61
Linear statistical models, (67) 88
Linear-time algorithm, (70) 391
l_p-norm, (67) 287
Local, (71) 120
Location, (65) 383, (65) 400, (70) 16
Location analysis, (65) 147
Location theory, (66) 305
Looped networks, (67) 248
Lot-sizing, (68) 134
Lot sizing, (71) 95
Lot-sizing problem, (65) 159
Lower bound, (64) 156
Low-income developing country, (68) 160

Machine grouping, (69) 357
Machine interference problem, (65) 259
Machine scheduling, (70) 432
Machine usage penalty function, (70) 391
Machining, (65) 351
Maintenance, (69) 38
Make-to-order, (64) 12
Make-to-order production, (69) 399
Make-to-stock production, (69) 399
Management, (66) 235, (67) 75, (67) 161
Management science, (70) 83
Manufacturing, (64) 45, (65) 362, (67) 297, (68) 9, (68) 105, (69) 50
Manufacturing cells, (69) 424, (69) 482
Manufacturing industries, (64) 12, (66) 279, (68) 265, (69) 26, (69) 292
Marie's method, (69) 250
Marketing, (66) 27, (68) 9
Market response functions, (66) 27
Markov chains, (66) 124, (71) 70
Markov decision, (69) 265
Markov decision process, (70) 405
Markov decision processes, (67) 188
Markov decision programming, (64) 38, (65) 175, (69) 75
Markov processes, (68) 228, (69) 92, (71) 110
Matching behavior, (71) 454
Material handling, (71) 353
Material Handling System, (69) 166
Materials, (64) 423
Mathematical programming, (64) 61, (64) 363, (65) 292, (65) 351, (66) 291, (66) 341, (67) 52, (67) 242, (67) 387, (69) 154, (70) 1, (70) 425, (71) 61, (71) 154, (71) 177
Mathematical programming modeling systems, (67) 25
Matrices, (69) 107
Matrix generators, (67) 25
Matrix geometric form, (65) 118
Matrix structure, (64) 216
Mean, (69) 265
Measurement, (67) 332, (68) 318
Median, (65) 400
Medical history, (71) 45
Metamodels, (69) 424
Military, (65) 278, (69) 50
Milk, (69) 221
Minimal repair, (69) 75
Mixed-integer programming, (64) 338, (70) 150
Mixed integer programming, (71) 257
Mixed-model assembly lines, (66) 259
Modal choice, (71) 288
Model assessment, (66) 250
Model choice, (66) 36
Modeling, (66) 161, (66) 216, (66) 235, (68) 9
Modelling, (66) 184
Model management, (71) 398
Model validation, (66) 168
Moving averages, (67) 272
MRP, (68) 49
Multicommodity location–allocation models, (65) 368
Multicommodity problems, (71) 398
Multicriteria, (66) 291
Multi criteria analysis, (66) 184
Multi-criteria analysis, (70) 16
Multi-echelon, (68) 49
Multi-level inventory system, (65) 96
Multilevel job shops, (68) 212
Multi-level location, (71) 130
Multi-machine scheduling, (70) 335
Multiobjective, (65) 33
Multiobjective programming, (68) 173
Multi-plant, (67) 141
Multiple criteria, (64) 384, (65) 58, (66) 148, (67) 1, (68) 344, (68) 352, (70) 115
Multiple-criteria, (68) 379
Multiple criteria decision-making, (67) 101
Multiple criteria linear programming, (64) 126, (71) 341
Multiple criteria programming, (68) 356, (70) 244, (71) 205
Multiple objective (criteria) linear programming, (68) 374
Multiple objectives, (68) 344
Multiple organization processes, (70) 67

Multiple routings, (69) 292
Multi-project planning, (64) 312
Multi-server queues, (65) 270
Multivariate statistical models, (71) 80
Multivariate statistics, (67) 101, (67) 332

Nash equilibrium, (71) 454
National decline, (69) 14
Necessary optimality conditions, (65) 327
Net present value, (64) 188, (65) 274
Network, (65) 33, (66) 372, (66) 392, (69) 97, (71) 188, (71) 419
Network decomposition, (71) 1
Network design, (71) 95
Network flows, (71) 398
Network planning, (70) 159
Network programming, (65) 218, (66) 279
Networks, (65) 44, (65) 400, (66) 148, (67) 52, (69) 92, (71) 154, (71) 177
Networks with gains, (64) 68
Neural networks, (69) 342
New aircraft systems, (66) 124
Newsboy problem, (68) 185
Nitrate pollution, (66) 36
Nondifferentiable optimization, (65) 327, (71) 439
Nonlinear dynamical systems, (68) 145
Nonlinear integer programming, (66) 259
Nonlinear mixed integer programming, (69) 399
Nonlinear multiobjective programming, (64) 115
Nonlinear optimization, (65) 292, (66) 36
Nonlinear programming, (65) 321, (65) 351, (67) 13, (68) 265, (69) 83, (71) 61
Non-linear programming, (67) 272
